Engineers at ROWE carefully combine professional expertise with a dedication to provide unsurpassed client service. We build and maintain relationships with our clients. Most importantly, we work to better our communities.

Our clients rely on their project manager for the technical skills, experience, and education necessary to successfully complete projects on time, within budget, and to their satisfaction.

Our nearly 60 years of engineering experience includes working closely with clients including small and large Michigan municipalities and townships, state agencies, American Indian tribes, medical centers, and universities.
