City of Imlay City Road Rehabilitation Project Wins Quality of Life Award

Flint, Michigan, February 16, 2018 – The City of Imlay City's project to rehabilitate Capac and North Fairgrounds roads was chosen by the American Public Works Association-Michigan Chapter for a Quality of Life Award.

The fall 2017 road resurfacing project included adding designated bike lanes to the streets. The award nomination indicated the lanes increase quality of life in the city by reducing emissions in the environment, making non-motorized travel along the roadway safer, and offering residents a healthy way to travel. ROWE Professional Services Company of Lapeer was the project's engineer and James P. Contracting, Inc. of Washington Township was the contractor.

The American Public Works Association-Michigan is an organization of nearly 700 public agency and private company members whose goal is to promote professional excellence and public works awareness through education, advocacy, and exchanging knowledge. The chapter is part of an 81-year-old national association of approximately 30,000.

ROWE's headquarters is in Flint, Mich.; additional offices are located in Lapeer, Mt. Pleasant, Farmington Hills, Lansing, Grayling, and the tri-cities area in Mich., and Myrtle Beach, SC.

ROWE is a full-service professional firm specializing in civil engineering, land surveying, aerial photography/mapping, landscape architecture, and community planning.
