ROWE Professional Services Company Projects Win Michigan Concrete Association Awards

Flint, Michigan, Dec. 15, 2015 – The Michigan Concrete Association (MCA) chose two projects for which ROWE Professional Services Company provided engineering services for Awards of Excellence. The projects were among more than 70 submissions for awards of excellence.

ROWE provided design and construction engineering on a team with prime contractor Zito Construction Company and concrete contractor Eastlund Concrete Construction, Inc. to complete Genesee County, Michigan's first roundabout. The roundabout is located at the intersection of Hill and Elms roads on the border of Gaines and Mundy townships. It replaces stop signs and flasher on Elms Road and was constructed to improve safety at the intersection. The project, which was completed for the Genesee County Road Commission, was chosen as the winner in the Intersections Category.

The Red Fox Outfitters parking lot project was chosen as winner of the Pervious Concrete Category. Pervious concrete allows water to drain through it, which was necessary for this project because there wasn't enough space for a traditional storm water management system. ROWE worked with Rhoads and Johnson to develop the innovative storm water solution for the parking lot, which is shared by the new Red Fox Outfitters store and the City of Fenton. Fessler and Bowman was the contractor for the project.

The MCA has approximately 220 members and is the state branch of the national trade association for the concrete pavement industry, which has a primary mission of creating and maintaining a strong national presence through dynamic, strategic leadership; effective technical expertise and resources; and persuasive advocacy on behalf of the industry.

ROWE's headquarters is in Flint, Mich.; additional offices are located in Lapeer, Mount Pleasant, Farmington Hills, Lansing, Grayling, and the tri-cities area in Mich., and Myrtle Beach, SC.

ROWE is a full-service professional firm specializing in civil engineering, surveying, aerial photography/mapping, landscape architecture, and planning.
