

Community Development Block Grant Assistance

Services

ROWE can help with the following regarding CDBG funds.

- Preparing narratives, concept drawings, and other supporting documentation for applications
- Completing application forms
- Providing civil engineering, construction engineering, and landscape architecture services adhering to CDBG requirements
- Ensuring projects stay on schedule to meet strict CDBG deadlines

Some of the types of CDBG funded projects ROWE has assisted with include:

- **Improvements to traditional downtown districts**
 - Blight elimination
 - Façade improvements
 - Property acquisition
 - Streetscapes
 - Farmers' markets
 - Parking improvements
 - Alley improvements
- **Job creation and retention**
 - Public water and sewer extensions
 - New/improved streets
 - Infrastructure improvements
 - Hydroelectric dam repairs

ROWE assists clients with consulting services related to the Michigan Economic Development CorporationSM Community Development Block Grant (CDBG) program from start to finish. We understand CDBG requirements, have assisted many clients with identifying projects that qualify for funding, and have completed several successful grant applications.

Once awarded the funds, we can provide surveying, engineering, planning, landscape architecture, and construction phase services to complete the project. We assist the community with procuring the services of a Certified Grant Administrator (CGA) who can assist and guide the community through funding requirements. Using a CGA allows communities to be reimbursed for these administrative costs.

We have a broad base of experience serving communities with a variety of projects.
