ROWE has been providing construction staking services to our clients for nearly 60 years. Our projects have ranged from small municipal utility projects to major highway reconstruction and gas transmission pipeline construction.

With our professional surveyors on staff licensed in 12 states, supported by office and field technicians, we have over 500 years of experience. For face-to-face and internal communications, our offices cover lower Michigan and northeast South Carolina.

Our crews are equipped with the most modern equipment and field computers, allowing us to transfer data directly from the office to the field to keep projects flowing smoothly.
