

Services

ROWE designs and preserves communities, including:

- Urban renewal and residential developments
- Open spaces and public land
- Waterfronts, marinas, water features
Recreational areas, including parks, zoos, arboretums, and amphitheaters
- School and university campuses
- Cemeteries
- Golf courses
- Transportation corridors
- Walkways, bicycle paths, and river trails
- Residential environments
- Sensitive natural areas and watersheds

We prepare plans focused on safe and environmentally conscious designs for:

- Drought-tolerant landscapes
- Resource management
- Temperature/wind control
- Flooding/erosion control
- Universal accessibility
- Safety/security/low-maintenance sites

At ROWE, we focus on our clients, their communities, and their expectations. We earn their trust by completing successful projects using the following professional services:

- Preserving the quality of the natural environment
- Creating land-use plans and downtown development plans
- Performing residential and commercial site planning
- Creating streetscapes, historic landscapes, and urban spaces
- Developing site and recreation master plans
- Conducting research on urban design and environmental planning
- Completing grant applications, administrative and funding research
- Coordinating consensus building, and designing presentations
- Presenting detailed planting plans and coordinating irrigation design
