

Non-Motorized Paths & Trailways

Services

ROWE's project services include:

- Concept plans
- Feasibility studies
- Design engineering
- Grant writing
- Construction observation

ROWE has completed more than \$15 million in pathway projects. Through extensive work with MDOT, county road commissions, municipalities, trail groups, and multi-jurisdictional groups, we have become proficient in the many facets involved in pathway projects.

Our professionals provide design options that allow communities to make informed decisions about issues that impact their trail's look, function, cost, and long-term maintenance.

We have access to resources that result in thorough and expedient projects. We enhance projects through:

- Experience with trail planning, design, and construction, involving multi-purpose uses, bridges, permitting, wetlands, and unique site conditions
- Consensus-building expertise with issues raised by the public and multiple stakeholders
- Involvement with local and statewide trail groups, committees, and innovations
